

Montana Creek (Stream No. 111-50-10500-2003) Tributary

Habitat Biologist Jackie Timothy and I tracked and trapped this stream on 5-11-10. This tributary is up to 20' wide in some locations and appears to provide rearing and spawning habitat. The stream flows directly into Montana Creek and originates from a small wetland/ pond area, it does not reconnect with Montana Creek.

Waypoint #	Location	Description
5	58.4363, -134.6421	Confluence with Montana Creek
24	58.4383, -134.6452	Minnow trap location, 11 coho 40-85mm, 2 Dolly Varden 40mm, 60mm
25	58.4388, -134.6451	Small pond where stream originates from, does not reconnect with Montana Creek.
